Subject: PA Beneficial Use New Source generators
Attachments: PADEP Notifications.docx

Good morning Mr. Gombeda

EPA is preparing to issue Notices of Non-compliance and Information Request Letters to four facilities in Pennsylvania that currently hold WMGR096 Beneficial Use or Clean-Fill permits. The nature of the NON/IRLs relates to use of PCB-contaminated materials as beneficial use or clean fill at the four facilities.

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

Deliberative Process / Ex. 5

The notifications you have sent Kelly Bunker include general information regarding the generator location and the PCB concentration. However I can't find an actual name or mailing address to where we could send the NON/IRL letters. Is this information a part of the documentation you receive when there is a "new-source" submittal? If so, could you forward that information to me? Attached is a table identifying all of the new-source submittals EPA has received to date. If a name and/or mailing address is available for the generators, the information would be greatly appreciated. Let me know if you have questions or need additional information.

Best regards
